Taking action toward your financial future Participate in your retirement plan

Village of Franklin Park Retirement Plan G76113

3 STEPS TO RETIREMENT PREPARATION

For educational use only.

Steps to retirement preparation

When it comes to retirement, it can be easy to think "I will get to that one day," or "One day that will be more of a priority." To have a better chance of reaching your retirement goals, it is important to make that "one day" today. By offering a retirement plan your employer has put you on a good path, but now it is up to you to take advantage of this important benefit. Read on for more information about the three steps you can take now to prepare for retirement.

- ESTIMATE YOUR NEED
- DETERMINE YOUR CONTRIBUTIONS
- 3 CHOOSE YOUR INVESTMENTS

1. Estimate your need

With the average life expectancy increasing, uncertainty around Social Security, rising healthcare costs and inflation continuing to erode the purchasing power of your money, participating in your retirement plan is more important than ever.

The amount you need in retirement income could play a significant role in reaching your future financial goals. It is important to take the time to look at your specific situation and retirement income needs before determining how much to contribute to your retirement account.

Only 48 percent of workers report that they and/or their spouses have taken the time to complete a retirement needs calculation, according to the 2015 Retirement Confidence Survey from Employee Benefit Research Institute and Mathew Greenwald & Associates.

Note: All individuals are fictitious and all numeric examples are hypothetical. These hypothetical investment returns are for educational purposes only and are not indicative of any particular investment or performance. Hypothetical returns assume reinvestment of earnings. Actual returns or principal value will vary. Balances shown are before reduction for taxes.

Use the "Retirement Income Strategy" tool at **www.oneamerica**. **com/retirementstrategy** to determine a suitable amount for your situation.

2. Determine your contributions

It is a smart idea to participate in your retirement plan as soon as possible. If you start contributing right away, your account may have more time to grow or weather ups and downs.

Your retirement plan contributions

The money you contribute to your retirement account is automatically deducted from your paycheck – before taxes are taken out. It goes directly into your retirement account, so your paycheck is actually less than it would have been. This means you are paying less in current income taxes for the year. This can help reduce the impact of contributing to your retirement plan on your take-home pay.

Put tax deferral to work for you

Tax deferral simply means the contributions to your retirement plan are not currently taxed. You are putting off paying taxes on that money until you withdraw it from your retirement account.

How can putting off paying taxes be a benefit? Not only are your contributions invested, but the deferred taxes allow your money to stay invested.

Roth Contributions

Unlike traditional qualified plan contributions, Roth contributions are made with after-tax dollars, which means that you are taxed on the full amount you earn first, and then your contribution is deducted. Roth contributions and earnings accumulate tax-free. When you reach retirement, your qualified distributions can be withdrawn tax-free.

The Roth option may make more sense for you if:

- You believe you will be in a higher tax bracket when you retire
- You prefer to reduce your future tax liability instead of your current tax liability
- You want tax-free growth

However, Roth is not for everyone. Weigh your options carefully.

The benefits of compounding

Compounding occurs when your initial investment generates a gain that is reinvested and experiences an additional earning. When the new balance (the original investment plus the gain) generates further earnings, the initial gain increases the total return of your initial investment. When the following gains are reinvested, future positive earnings are further compounded.

Compounding example

Thanks in part to compounding, the difference between the contributions to Michael's account and his actual account balance at retirement is \$151,149!

\$100

Total contribution \$48k

\$48k = \$199,149

Monthly contribution over 40 years

Note: This hypothetical investment return and fictitious name is designed to demonstrate the impact of compounding returns and is not indicative of any particular investment or performance. Hypothetical returns assume reinvestment of earnings and a 6 percent average return on investment. Actual returns or principal value will vary. Balance shown is before reduction of taxes.

3. Choose your investments

An important and sometimes confusing step in retirement preparation is choosing which options to invest in. Because each investor has different goals and different circumstances, there is no set strategy that works for everyone.

Investment types

There are different types of investments in which you may choose to invest your retirement plan contributions. The three main types are:

- Stocks
 - Stocks have historically had the greatest risk and highest returns among the three major investment types.
- Bonds
 - Bonds are generally less volatile than stocks but offer more modest returns.
- Cash equivalents
 - Cash equivalents such as certificates of deposit, treasury bills and money market funds – are generally the most conservative investments, but offer a lower potential for return than the other major investment types.

Another type of investment, called an Asset Allocation investment, provides investors with a blended portfolio of different types of investments in a single option. These investments are a good option for investors who would prefer to allow professional money managers to make adjustments to their investments as the market fluctuates.

AUL's Retirement Services products offer flexibility and diversity in investment options through our group annuity contract to help plan participants reach their retirement goals. Participants invest in an AUL separate account, which in turn invests in underlying funds. Plan participants are credited with units of the AUL separate account, not shares of any underlying fund.

Understanding risk and return

Investment risk is the potential for an investment to lose value. Return is the change in value on an investment. Higher returns are usually associated with

greater risks, while investments with lower returns generally have a lower risk level. Understanding the relationship between risk and return is very important as you develop your investment strategy.

The amount of investment risk you are willing to take, also known as your "risk tolerance," is a personal decision, which can be shaped by many factors including the amount of time you have until retirement, also known as your "time horizon."

- · Risk tolerance
 - Some people are comfortable taking on the risk of frequent ups and downs of the stock market in return for potentially greater long-term returns.
 Others prefer the possibility of a slow, steady return with lower risk investments.
 Understanding your personal attitude toward risk can help you find the right mix of investments for your portfolio.
- Time horizon
 - The longer you have until retirement, the more risk you can potentially afford to take.

Mixing it up with diversification

Because different investment types have varying levels of risk and return, it is important to make sure you have a good mix of investments in your portfolio. This strategy, called diversification, aims to balance risk and reward by allocating assets according to your goals, risk tolerance and investment horizon.

Note: Each group of investments carries its own unique risks. Before investing, please read each fund prospectus for a detailed explanation of the risks, fees, and costs associated with each underlying investment. Although you might reduce volatility and risk with diversification, you can't eliminate investment risk altogether. Diversification does not ensure a profit or protect against loss. Bond funds have the same interest rate, inflation and credit risks that are associated with the underlying bonds owned by the fund.

Money Market funds are not typically insured or guaranteed by the Federal Deposit Insurance Corporation or any other federal government agency. Although they seek to preserve the value of your investment at \$1.00 per share, it's possible to lose money by investing in money market funds.

What type of investor are you? Find out by completing the Asset Allocation Builder questionnaire on the following pages.

Investment support

Because choosing investment options can be difficult, the Village of Franklin Park Retirement Plan offers you assistance with these important decisions, including tools and resources provided by AUL and others available from independent, third parties.

Target date investment options

Your plan offers target date investments. Target date investments are types of Asset Allocation investments designed for investors who prefer to be less "hands-on" when it comes to their investment management.

With target date investments, which are based on your anticipated date of retirement, investments are progressively rebalanced for you from riskier investments to more conservative investments as you near retirement.

More information on your plan's investment options can be found in your enrollment materials, during online enrollment or by logging in to your secure account.

Note: Target Date Funds are designed for people who plan to retire and begin taking withdrawals during or near a specific year. These funds use a strategy that reallocates equity exposure to a higher percentage of fixed investments; the funds will shift assets from equities to fixed-income investments over time as you near retirement. It's important to remember that no strategy can assure a profit or prevent a loss in a declining market and the principal value of the Target Date Funds is not guaranteed at any time, including the target date. Target Date Funds are designed to provide diversification and asset allocation across several types of investments and asset classes, primarily by investing in underlying funds. Therefore, in addition to the expenses of the Target Date Funds, an investor is indirectly paying a proportionate share of the applicable fees and expenses of the underlying funds. The principal

amounts invested into these funds are not guaranteed at any point and may lose value.

My OneCheckSM Online

My OneCheck Online from MasteryPOINT Financial Technologies is available to you by logging into your account at *www.oneamerica.com*. This tool includes resources to help you create your personal retirement strategy:

- Strategy Builder: The My OneCheck Online Strategy Builder web tool is designed to help you create a retirement action plan and provides recommendations from MasteryPOINT that may move you closer to your retirement goals.
- Retirement education information: The education section of the tool provides information on retirement preparation concepts and the advantages of your retirement plan.
- Calculators: The Distribution Planner and Paycheck calculators are helpful retirement preparation and financial resources.

Note: MasteryPOINT's My OneCheck Online Retirement Income Strategy (RIS) tool is a sophisticated retirement planning tool designed to provide you with valuable help in reaching your retirement goals. However, the tool's forecasts and projections are derived from mathematical modeling techniques of the economic and financial markets that may or may not reflect actual conditions and events. The asset projections and suggestions of asset allocation strategies furnished through the RIS tool are based on information and assumptions you provide about your current financial, personal, family status, and expected returns as well the historical performance of various asset categories available within your plan. While My OneCheck Online can provide you with insights on which investment asset categories offered by your Plan appear to best fit your retirement needs, you are solely responsible for using your own best judgment to choose the investments that are most suitable for you.

Methodology

The My OneCheck Online RIS tool generates retirement wealth and retirement income projections based on current account balances, current salary, retirement age, life expectancy, current savings rates and rate of return assumptions entered by the participant. The risk questionnaire provides a series of questions that are used to determine the user's tolerance for risk. Based on his/her answers to the questions, the tool assigns each user a conservative, moderate, or aggressive risk profile. The tool then displays a suggested mix of assets that may be appropriate for the user's time horizon to retirement

and risk profile. Consult with your financial professional to discuss how other investment options can be combined with your asset level suggestions to best meet your overall retirement or other financial goals.

Limitations and key assumptions

- There can be no assurance that any of the suggestions for modification of participant savings level, participant retirement age, participant retirement goal, or participant risk level will generate any specific level of retirement date wealth or income in retirement.
- These illustrations are hypothetical and based on the information and variables you provide. Investing involves risk including the potential for loss of principal. Past performance is not a guarantee of future results. Your actual investment experience will vary.
- Any investment involves risk and there is no assurance that the investment objective of any investment option will be achieved. Before investing, understand that your investments are subject to market risk, including possible loss of principal.
- The use of diversification and asset allocation as part of an overall investment strategy does not assure a profit, or protect against loss in a declining market.
- Monthly retirement plan contributions are made at the end of each month prior to retirement at the specified rate you selected.
- Your retirement plan assets grow at the pre- and post-retirement rates of return you selected.
- Your salary growth before retirement is calculated at an annual rate of 3%. Contributions into the Plan before retirement will also grow at the same rate. Income growth after retirement is set to the inflation rate.
- After retirement, your growth-adjusted salary is withdrawn from your retirement plan balance each month. This amount is indicated as withdrawn before investment growth is applied for the month.
- Monthly compounding is applied to rates of return and inflation. These values are applied at the rate you select, divided by 12 for growth of retirement plan balances.
- Social Security is calculated based on your current salary. An earnings base for up to 35 working years prior to retirement date is calculated. Your current Social Security benefits are calculated from your assumed earnings base and that of your spouse

- (whether non-working spouse or working spouse if his/her age and salary are specified). A 2.5% annual growth factor is applied to your Social Security benefits after retirement. The calculated benefit is added to your retirement plan balance at the end of each month during retirement. Benefits are reduced for early retirement and increased for late retirement according to current Social Security regulations.
- If you are married and do not explicitly exclude the spouse Social Security benefit, a spousal benefit equal to one half of your benefit will be computed and added to your balance.
- If you retire before your normal retirement age (65, 66, or 67 depending on your age), your Social Security benefit will be reduced by the standard reduction formula. If you retire before age 62, your benefit may be reduced even further. The program does not consider your salary and Social Security contribution history. As a result, your computed benefit when you retire early may be less than your actual benefit. Contact the Social Security Administration for a more accurate benefit estimate.
- Your federal tax rate is calculated based upon your current salary (including spouse salary, if entered) and assumes only the standard deduction. State taxes are not considered in the analysis.

Other risks and limitations

MasteryPOINT My OneCheck Online cannot independently monitor, review, or update the recommendations or projections you receive from it, nor does it have the capability to monitor or review the investment decisions you make based on its recommendations or projections. Because the tool's utility depends on the completeness, accuracy and timeliness of the information you provide, you are solely responsible for reviewing and updating information within the tool. You understand that you must provide complete and accurate information when requested by My OneCheck Online in order to get meaningful results from it.

IMPORTANT: The projections or other information generated by this RIS tool regarding the likelihood of various investment outcomes are hypothetical in nature, do not reflect actual investments results and are not guaranteed. RIS does not evaluate every possible investment or retirement strategy you could use, particularly when considering investments outside of your employer sponsored pension plan. As a result, the recommendations of RIS may not

have considered investments or strategies that would produce similar or superior results. Additionally, the results provided by RIS may vary with each use and over time depending on the assumptions you enter.

Schlindwein Associates, LLC is an independent Registered Investment Advisor, and neither Schlindwein Associates, LLC nor MasteryPOINT are affiliates of any of the companies of OneAmerica. What type of investor are you? Based on your personal situation and comfort level with investing, this questionnaire can help you select your investor profile. Answer these questions and total your score at the bottom. The total score recommends which

of the five risk profiles is most appropriate for you.

If you'd prefer to complete this questionnaire online, visit www.oneamerica.com/ AssetAllocation.

Bonds	40%

Growth strategy

Score 34–40

The growth investment strategy seeks to provide high long-term capital appreciation with low current income.

Investment	Percentage
Stocks	80%
■ Bonds	20%

Equity growth strategy

Score 41–50

An equity growth strategy seeks to provide high long-term capital appreciation.

Investment	Percentage
Stocks	100%
■ Bonds	0%

Note:Not all plans offer investment options in all categories.

Note:While diversification through an asset allocation strategy is a useful technique that can help to manage overall portfolio risk and volatility, there is no certainty or assurance that a diversified portfolio will enhance overall return or outperform one that is not diversified. An investment made according to asset allocation models neither guarantees a profit nor eliminates the possibility of loss.

Plan highlights

The following information is a brief summary of your retirement plan's features. While this information outlines many of the provisions of the plan, it does not provide you with every plan detail. Additional plan-specific provisions or limitations may apply. Plan documents govern this plan and contain a full set of rules for the plan. If there are discrepancies between this summary and the plan documents, the plan documents will govern. Please refer to your summary plan description (SPD), summary of material modifications (SMM), or contact your plan representative for more information.

In this section, learn more about:

- Eligibility
- Contributions
- Vesting
- Withdrawals/Distributions
- ERISA Section 404(c)
- ERISA Section 404(c)(5)
- Enrollment and Account management

Eligibility

When am I eligible to participate in the plan?

You are immediately eligible to participate in the plan.

Note: Certain employees may be ineligible to participate in the plan. Please refer to your SPD or SMM for additional information.

When am I eligible to enroll in the plan?

When you have met the eligibility requirements, you may enroll at any time.

Contributions

How much can I contribute to the plan in pre-tax contributions?

Through payroll deduction you can contribute up to 100% of your wages, salary, earnings (and bonus, if applicable).

Can I make Roth contributions to the plan?

The plan allows you to make Roth after-tax contributions. The Internal Revenue Service (IRS) dollar limit applies cumulatively to pre-tax and Roth after-tax contributions.

Note: An Internal Revenue Service (IRS) dollar limit cap applies. The dollar limit is \$18,500 for the 2018 calendar year. Additional plan-specific provisions or limitations may apply.

Can I make catch-up contributions to the plan?

If you are age 50 or older (or will turn age 50 during the calendar year) you may be eligible to make catch-up contributions.

Note: Before you can make catch-up contributions, you must first reach the elective deferral dollar limit (the Internal Revenue Code (Code) section 402(g) limit), the annual additions limit (the Code section 415 limit), the plan's deferral limit, or the Actual Deferral Percentage (ADP) limit. The maximum catch-up contribution limit is \$6,000 for the 2018 calendar year.

When can I change or stop my contributions to the plan?

You can change your contributions or stop your contributions at any time.

Note: If you stop your contributions, you can only start contributing again in accordance with plan provisions.

Vesting

What is "vesting"?

Vesting is the non-forfeitable ownership (or partial ownership) by an employee of the retirement account balances or benefits contributed to that employee's account.

You are always 100% vested in your deferral contributions to the plan, any rollovers or transfers to the plan, plus any earnings they generate.

Note: Additional plan-specific provisions or limitations may apply. Please refer to your SPD or SMM for more information.

Withdrawals/ Distributions

Once invested, when can I withdraw money from my account?

While your plan may provide for additional withdrawal options, in general withdrawals or distributions from your account can be made at death, for an unforeseeable emergency, or de minimis exception.

While the plan is intended to help set aside money for your retirement, the plan also includes a loan feature that may allow you to borrow money from your account. Other requirements, limitations or fees may apply.

Note: Because withdrawals/distributions from your account may be taxable to you, and withdrawals prior to reaching age 59½ may be subject to an additional 10% penalty tax, consider talking with your tax advisor before withdrawing money from your account.

ERISA Section 404(c) statement

The plan is intended to be an ERISA Section 404(c) plan. This means that you "exercise control" over the investments in your plan account.

You will choose which investments to put your money in now and you can choose different investment options as your needs change. This allows you to invest in the way that best meets your personal goals. Your investment elections remain in force until changed. Your employer and the fiduciaries of the plan may be relieved of liability for any losses that your account may experience as a result of investment choices made by you or your beneficiary.

If you do not make any investment option elections, your contributions will be credited to the default investment option identified in the contract. Monies defaulted to the default investment option will remain invested in that option until you transfer such amounts to another investment option. Once you provide investment option elections, new contributions will be allocated according to those elections.

All or a part of your account value may be transferred between the available variable investment options at any time during the Accumulation Period, but no more frequently than once per day. However, the companies of OneAmerica reserve the right to reject any transfer request which it reasonably determines to be made in connection with abusive trading practices, such as market timing or excessive trading by an investor or by accounts of investors under common control.

The following transfer restriction will apply to monies in the Fixed Interest Account (FIA), including monies defaulted to the FIA:

One hundred percent (100%) may be transferred from the FIA at any time. However, once a transfer has been made from your FIA, transfers back into the FIA are allowed only after 90 days have elapsed since your last transfer from the FIA.

Your plan does not offer a brokerage window, therefore pass-through of voting, tender, and similar rights do not apply.

You may request information such as annual operating expenses of each investment option available under the plan that reduce the rate of return; prospectuses, financial statements, reports, or other materials relating to

investment options available under the plan; a list of assets comprising each investment option which constitutes plan assets and the value of those assets; the value of units in investment options available under the plan and the past and current performance of each such investment option; and information on the value of units in those investment options held in your own account, from:

Lisa Anthony Village of Franklin Park 9500 Belmont Avenue Franklin Park, IL 60131 847-671-8282

ERISA Section 404(c)(5) notice

The plan is also intended to be an ERISA Section 404(c)(5) compliant plan. This means that if you do not make any investment option elections, your contributions will be credited to the default investment option identified in the contract (which is intended to be a "Qualified Default Investment Alternative", or "QDIA"). Once you provide investment option elections, new contributions will be allocated according to those elections. Monies defaulted to the default investment option will remain invested in that option until you transfer such amounts to another investment option. The QDIA for the plan is: American Century One Choice Investments.

Account management

Where can I go to access my account information or receive assistance?

- Website: www.oneamerica.com
- Voice response system and customer service: 1-800-249-6269
 - Representatives are available Monday through Friday from 8 a.m. - 8 p.m. Eastern Time (ET).

Plan-specific provisions or limitations may apply. Please see your SPD or SMM.

Investment information

The quality of the options in which your retirement assets are invested is an important part of reaching your retirement goals. Understanding the characteristics of each investment, such as risk, return and expense in addition to routinely reviewing the performance of your plan's investment offerings is key. Read on to learn more about the options offered by your plan.

In this section, you will find:

- Information on how to read investment performance
- Investment performance for options offered by your plan
- Tips on reading investment option summary pages
- Investment option summary pages for your plan's options

How to read investment performance information

When determining suitable investment options, it is important to look at the performance of the options available in your plan. While past performance does not guarantee future results, this information can give you some background data to use when choosing where to invest your retirement assets.

1. Investment Option (Internal Code)

 This column shows the investment options available for the plan.

2. Investment Type

 The "Investment Type" is the category in which the option falls. This is helpful when comparing options and determining where you'd like to invest.

3. Net Expense Ratio

— The Net Expense Ratio is the annual operating expenses of the underlying investment vehicle divided by the average net assets of the underlying investment vehicle, inclusive of any applicable waiver of fees or expense reimbursements.

4. Year to Date (YTD), 1-year, 3-year, 5-year and 10-year or inception performance

 This information shows the investment option's performance for the specific time period.

5. Investment Option Inception Date

 This is the date the investment option was first made available to investors.

Note: While investment performance is available for most investment options, it is not available for all options. Some performance data may be provided by the investment's manager or not available at this time.

Annualized performance

as of 09/30/2018

Note: Returns are historical and past performance does not guarantee future results. Current performance may be lower or higher than the performance quoted. The investment return and principal value of the investment accounts will fluctuate, thus a participant's units/shares may be worth more or less than their original cost when redeemed.

Note: Annualized total return figures shown are net of the ordinary operating expenses for each fund, but may not reflect a deduction for any contract related charges and fees such as mortality &

expense risk charges, administrative expenses, premium tax charges, maintenance fees or other expenses that might be incurred under a group variable annuity contract. If included in these total return figures, any such charges would lower the performance shown. For a complete description of the charges, expenses or fees that apply to your contract, please contact your Employer or Plan Administrator. For a more complete description of the performance calculation and other important information, write to One American Square, Indianapolis, IN 46282, 1-800-249-6269.

Additional information about your investment options

Note: Any performance reported before AUL first offered an investment account is hypothetical and was calculated by adjusting the underlying fund's performance by current applicable contract charges.

Note: Unit values are based on net asset values provided by the fund company and not independently verified by OneAmerica. If OneAmerica receives corrected information, the net asset value will be recomputed and your account will be recalculated, if necessary, to reflect the corrected net asset value, provided that the error was material under federal securities laws.

Asset Class and Investment Option Specific Disclosures

- **1. Note:** Bond funds have the same interest rate, inflation and credit risks that are associated with the underlying bonds owned by the fund.
- **2. Note:** Funds that invest in high-yield bonds are subject to greater credit risk and price fluctuations than funds that invest in investment grade bonds.
- **3. Note:** Funds investing in stocks of small, mid-sized, and emerging companies may have less liquidity than those investing in larger, established companies and may be subject to greater price volatility and risk than the overall stock market.
- **4. Note:** Investing in international markets involves risks not associated with investing solely in the U.S., such as currency fluctuation, potential political and diplomatic instability, liquidity risks, and differences in accounting, taxes, and regulations.
- **5. Note:** Sector funds may experience greater short-term price volatility than more diversified equity funds. Funds that invest in a concentrated sector or focus on a relatively small number of securities may be subject to greater volatility than a more diversified investment.
- **6. Note:** Target Date Funds are designed for people who plan to retire and begin taking withdrawals during or near a specific year. These funds use a strategy that reallocates equity exposure to a

higher percentage of fixed investments; the funds will shift assets from equities to fixed-income investments over time. As a result, the funds become more conservative over time as you approach retirement. It's important to remember that no strategy can assure a profit or prevent a loss in a declining market and the principal value of the Target Date Funds is not guaranteed at any time, including the target date. Target Date Funds are designed to provide diversification and asset allocation across several types of investments and asset classes, primarily by investing in underlying funds. Therefore, in addition to the expenses of the Target Date Funds, an investor is indirectly paying a proportionate share of the applicable fees and expenses of the underlying funds. The principal amounts invested into these funds are not guaranteed at any point and may lose value.

Additional Notes

Note: The use of asset allocation or diversification does not assure a profit or guarantee against a loss.

Note: Non-registered group annuity contracts are issued by American United Life Insurance Company® (AUL), One American Square, Indianapolis, IN 46206, 1-800-249-6269. While a participant in an annuity contract may benefit from additional investment and annuity related benefits under the annuity contract, any tax deferral is provided by the plan and not the annuity contract.

Note: Participants invest in AUL separate accounts, which in turn invest in underlying funds. Plan participants own units of an AUL separate account, not shares of any underlying fund.

Note: If a participant invests in assets held with another company, recordkeeper or vendor, they will receive more than one statement detailing their investments. Examples of these types of assets include self-directed brokerage accounts, real estate, life insurance, or assets with another vendor.

Note: Log into your secure account at www.oneamerica.com to obtain the most current calendar month end performance.

How to read investment option summary pages

1. Investment name

The name of the investment option

2. Morningstar category

The category in which this investment falls

3. Overall Morningstar Rating™

A measurement by
 Morningstar of how this
 investment has performed
 relative to similar offerings
 after costs and risks are taken
 into consideration

4. Investment strategy

 The objective of the investment and how the portfolio manager intends to reach that objective

5. Composition

 The holdings of the investment, broken down by general investment class

6. Morningstar Style Box™

 A visual representation of where the investment option falls in terms of size, style and risk

7. Top 5 holdings

 The top 5 stocks and bonds with the most influence on the returns of this investment option

8. MorningstarEquitySuperSectors

 How much of the investment is held in each of Morningstar's three Super Sectors, which are comprised of 11 sectors according to their primary business.

- Sensitive Super Sector:
 Communication Services,
 Energy, Industrials
 and Technology
- Defensive Super Sector: Healthcare, Consumer Defensive and Utilities
- Cyclical Super Sector: Basic Materials, Consumer Cyclical, Financial Services and Real Estate

9. Volatility analysis

A summary of the investment's past price fluctuation

10. Risk measures

- Alpha: The difference between the investment's active returns and its expected performance (given its level of risk)
- Beta: A measurement of the investment's sensitivity to market movements

- R-Squared: The percentage of the investment's movements as explained by movements in its benchmark index
- Sharpe Ratio: Uses standard deviation and excess return to determine reward per unit of risk
- Standard Deviation: A statistical measure of the volatility of the investment's returns

11. Operations

 Information on inception dates, availability and restrictions, as well as the portfolio manager's name and contact information

Note: Some of the sections on this example may vary based on investment option.

Note: While investment options summary pages are available for most investment options, they are not available for all options. Some summary pages may be provided by the investment's manager or not available at this time.

AUL Fixed Interest Account

Out of 447 Stable Value investments. An investment's overall Morningstar Rating, based on its risk-adjusted return, is a weighted average of its applicable 3-, 5-, and 10-year Ratings. See disclosure page for details.

Stable Value

Investment Strategy from investment's prospectus
This is an interest-earning investment option, backed by AUL's general account assets. AUL guarantees that interest will be credited at the higher of the rate guaranteed in the group annuity contract and the current rate declared by it. AUL may change the initial interest rate for future contributions. New contributions are guaranteed to earn the applicable initial interest rate for at least a one-year time period from the date contributions are made. Changes in the initial interest rate or in the interest rate for prior contributions will also be effective for at least one year. In no event will the interest rate ever be below the rate guaranteed in the group annuity contract. AUL bears the investment risk for the AUL Fixed Interest Account values and for paying interest.

The volatility measure is not displayed for investments with fewer than three years of history. The category average, however, is shown above.

BlackRock US Debt Index CI 66

Morningstar Category Intermediate-Term Bond

Investment Strategy from investment's prospectus
The fund seeks to achieve investment results that are similiar
to the price and yield performance, before fees and expenses,
of the Bloomberg Barclays U.S. Aggregate Bond Index.
BlackRock uses a representative sampling indexing strategy to
manage the underlying fund.

Volatility Analysis

Risk: Below Average

In the past, this investment has shown a relatively small range of price fluctuations relative to other investments. Based on this measure, currently more than two-thirds of all investments have shown higher levels of risk. Consequently, this investment may appeal to investors looking for a conservative investment strategy.

Investment Strategy from investment's prospectus

The investment seeks total return

The fund will seek to achieve its objective through a mix of current income and capital appreciation as determined by the fund's investment subadviser. It invests, under normal circumstances, at least 80% of the fund's investable assets in bonds. For purposes of this policy, bonds include all fixedincome securities, other than preferred stock, with a maturity at date of issue of greater than one year. The fund may invest up to 30% of its investable assets in high risk, below investmentgrade securities having a rating of not lower than CCC. It may invest up to 30% of its investable assets in foreign debt securities

Volatility Analysis

Risk: Below Average

In the past, this investment has shown a relatively small range of price fluctuations relative to other investments. Based on this measure, currently more than two-thirds of all investments have shown higher levels of risk. Consequently, this investment may appeal to investors looking for a conservative investment strategy.

Investment Strategy from investment's prospectus

The investment seeks to maximize current income; and capital appreciation is a secondary objective.

The fund normally invests at least 80% of its investable assets in a diversified portfolio of high yield fixed-income instruments rated Ba or lower by Moody's Investors Service (Moody's) or BB or lower by S&P Global Ratings (Standard & Poor's), and instruments either rated by another nationally recognized statistical rating organization (NRSRO), or considered to be of comparable quality, that is, junk bonds.

Volatility Analysis

Investment Strategy from investment's prospectus

The investment seeks conservation of capital, current income and long-term growth of capital and income.

The fund uses a balanced approach to invest in a broad range of securities, including common stocks and investmentgrade bonds. It also invests in securities issued and guaranteed by the U.S. government and by federal agencies and instrumentalities. In addition, the fund may invest a portion of its assets in common stocks, most of which have a history of paying dividends, bonds and other securities of issuers domiciled outside the United States.

Volatility Analysis

Investment Strategy from investment's prospectus

The investment seeks to produce income and to provide an opportunity for growth of principal consistent with sound common stock investing

The fund invests primarily in common stocks of established companies that are listed on, or meet the financial listing requirements of the New York Stock Exchange and have a strong record of earnings and dividends. Its advisor strives to maintain a fully invested, diversified portfolio, consisting primarily of high-quality common stocks.

Volatility Analysis

Risk: Average

In the past, this investment has shown a relatively moderate range of price fluctuations relative to other investments. This investment may experience larger or smaller price declines or price increases depending on market conditions. Some of this risk may be offset by owning other investments with different portfolio makeups or investment strategies.

Investment Strategy from investment's prospectus The investment seeks long-term growth of capital and income

The fund invests primarily in common stocks of companies that appear to offer superior opportunities for capital growth and most of which have a history of paying dividends. It may invest significantly in securities of issuers domiciled outside the United States. The investment adviser uses a system of multiple portfolio managers in managing the fund's assets.

Volatility Analysis

Risk: Average

In the past, this investment has shown a relatively moderate range of price fluctuations relative to other investments. This investment may experience larger or smaller price declines or price increases depending on market conditions. Some of this risk may be offset by owning other investments with different portfolio makeups or investment strategies.

Morningstar Return Morningstar Risk Out of 1166 Large Blend investments. An investment's overall Morningstar Rating, based on its risk-adjusted return, is a weighted average of its applicable 3-, 5-, and 10-year Ratings. See disclosure page for details.

Morningstar Category Overall Morningstar Rating Morningstar Risk Morningstar Return Large Blend

Out of 1166 Large Blend investments. An investment's overall Morningstar Rating, based on its risk-adjusted return, is a weighted average of its applicable 3-, 5-, and 10-year Ratings. See disclosure page for details

Investment Strategy from investment's prospectus

The State Street S&P 500 Index Fund (the "Fund") seeks an investment return that approximates as closely as practicable, before expenses, the performance of the S&P 500® (the "Index") over the long term. The Fund is managed using a "passive" or "indexing" investment approach, by which State Street attempts to match, before expenses, the performance of the Index. State Street will typically attempt to invest in the securities comprising the Index in the same proportions as they are represented in the Index. In some cases, it may not be possible or practicable to purchase all of the securities comprising the Index, or to hold them in the same weightings as they represent in the Index. In those circumstances, State Street may employ a sampling or optimization technique to construct the portfolio in question. The Fund's returns may vary from the returns of the Index. From time to time State Street may purchase securities that are not yet represented in the Index or sell securities that have not yet been removed from the Index.

Volatility Analysis

The Fund is managed using a "passive" or "indexing" investment approach, by which State Street attempts to match, before expenses, the performance of the Index. State Street will typically attempt to invest in the securities comprising the Index in the same proportions as they are represented in the Index. In some cases, it may not be possible or practicable to purchase all of the securities comprising the Index, or to hold them in the same weightings as they represent in the Index. In those circumstances, State Street may employ a sampling or optimization technique to construct the portfolio in question. The Fund's returns may vary from the returns of the Index.

Volatility Analysis

Risk: -

The volatility measure is not displayed for investments with fewer than three years of history. The category average, however, is shown above.

Release Date: 06-30-2018 Overall Morningstar Rating Morningstar Return Morningstar Risk

Average Below Average Out of 344 Foreign Large Growth investments. An investment's overall Morningstar Rating, based on its risk-adjusted return, is a weighted average of its applicable 3-, 5-, and 10-year Ratings. See disclosure page for details.

Investment Strategy from investment's prospectus The investment seeks long-term growth of capital.

The fund invests primarily in common stocks of issuers in Europe and the Pacific Basin that the investment adviser believes have the potential for growth. Growth stocks are stocks that the investment adviser believes have the potential for above-average capital appreciation. It normally will invest at least 80% of its net assets in securities of issuers in Europe and the Pacific Basin. The fund may invest a portion of its assets in common stocks and other securities of companies in emerging markets.

Volatility Analysis

Risk: Average

In the past, this investment has shown a relatively moderate range of price fluctuations relative to other investments. This investment may experience larger or smaller price declines or price increases depending on market conditions. Some of this risk may be offset by owning other investments with different portfolio makeups or investment strategies.

Out of 344 Foreign Large Growth investments. An investment's overall Morningstar Rating, based on its risk-adjusted return, is a weighted average of its applicable 3-, 5-, and 10-year Ratings. See disclosure page for details.

Investment Strategy from investment's prospectus The investment seeks capital appreciation.

The fund mainly invests in the common stock of growth companies that are domiciled or have their primary operations outside of the United States. It may invest 100% of its assets in securities of foreign companies. The fund may invest in emerging markets as well as in developed markets throughout the world. It normally will invest at least 65% of its total assets in common and preferred stocks of issuers in at least three different countries outside of the United States, and emphasize investments in common stocks of issuers that the portfolio managers consider to be "growth" companies.

Volatility Analysis

Risk: Above Average

In the past, this investment has shown a wide range of price fluctuations relative to other investments. This investment may experience significant price increases in favorable markets or undergo large price declines in adverse markets. Some of this risk may be offset by owning other investments that follow different investment strategies.

★★★ Average Average

Out of 721 Large World Stock investments. An investment's overall Morningstar Rating, based on its risk-adjusted return, is a weighted average of its applicable 3-, 5-, and 10-year Ratings. See disclosure page for details.

Investment Strategy from investment's prospectus
The investment seeks long-term growth of capital while providing current income.

The fund invests primarily in common stocks of wellestablished companies located around the world, many of which have the potential to pay dividends. It invests, on a global basis, in common stocks that are denominated in U.S. dollars or other currencies. Under normal market circumstances, the fund will invest a significant portion of its assets in securities of issuers domiciled outside the United States, including those based in developing countries.

Volatility Analysis

Investment Strategy from investment's prospectus The investment seeks long-term growth of capital

The fund normally invests at least 80% of investable assets in equity and equity-related securities of natural resource companies and in asset-based securities. Natural resource companies are U.S. and foreign (non-U.S. based) companies that own, explore, mine, process or otherwise develop, or provide goods and services with respect to, natural resources. Asset-based securities are securities, the values of which are related to the market value of a natural resource. The principal type of equity in which the fund invests is common stock. It is non-diversified

 Average
 Below Average

Out of 203 Target-Date 2020 investments. An investment's overall Morningstar Rating, based on its risk-adjusted return, is a weighted average of its applicable 3-, 5-, and 10-year Ratings. See disclosure page for details.

Investment Strategy from investment's prospectus
The investment seeks the highest total return consistent with its asset mix.

The fund is a "fund of funds," meaning that it seeks to achieve its objective by investing in other American Century mutual funds (the underlying funds) that represent a variety of asset classes and investment styles. The target date in the fund name (2020) refers to the approximate year an investor plans to retire and likely would stop making new investments in the fund.

Volatility Analysis

Risk: Below Average

In the past, this investment has shown a relatively small range of price fluctuations relative to other investments. Based on this measure, currently more than two-thirds of all investments have shown higher levels of risk. Consequently, this investment may appeal to investors looking for a conservative investment strategy.

Out of 65 Target-Date 2060+ investments. An investment's overall Morningstar Rating, based on its risk-adjusted return, is a weighted average of its applicable 3-, 5-, and 10-year Ratings. See disclosure page for details.

Investment Strategy from investment's prospectus The investment seeks the highest total return consistent.

The investment seeks the highest total return consistent with its asset mix.

The fund is a "fund of funds," meaning that it seeks to achieve its objective by investing in other American Century mutual funds (the underlying funds) that represent a variety of asset classes and investment styles. The underlying stock funds draw on growth, value and quantitative investment techniques and diversify investments among small, medium and large U.S. and foreign companies. The underlying bond funds invest in fixed-income securities that vary by issuer type (corporate and government), credit quality and geographic exposure (domestic and international).

Volatility Analysis Risk: —

however, is shown above.

The volatility measure is not displayed for investments with fewer than three years of history. The category average,

a secondary objective.

Investment Strategy from investment's prospectus
The investment seeks current income; capital appreciation is

The fund is a "fund of funds," meaning that it seeks to achieve its objective by investing in other American Century mutual funds (the underlying funds) that represent a variety of asset classes and investment styles. The fund's investments generally will be allocated among the major asset classes as follow: 45% of its assets in equity securities (stock funds); 45% of its assets in fixed-income securities (bond funds); and 10% of its assets in cash equivalents (money market funds). The neutral mix of One Choice In Retirement Portfolio is expected to remain fixed over time.

Volatility Analysis

Risk: Below Average

In the past, this investment has shown a relatively small range of price fluctuations relative to other investments. Based on this measure, currently more than two-thirds of all investments have shown higher levels of risk. Consequently, this investment may appeal to investors looking for a conservative investment strategy.

Morningstar Rating™

Often simply called the Star Rating, the Morningstar Rating brings load-adjustments, performance (returns) and risk together into one evaluation. To determine an investment option's star rating for a given time period (three, five, or 10 years), the investment option's risk-adjusted return is plotted on a bell curve: If the investment option scores in the top 10% of its category, it receives 5 stars (Highest); if it falls in the next 22.5% it receives 4 stars (Above Average); a place in the middle 35% earns 3 stars (Average); those lower still, in the next 22.5%, receive 2 stars (Below Average); and the bottom 10% get only 1 star (Lowest). The Overall Morningstar Rating is a weighted average of the available three-, five-, and 10-year ratings.

Morningstar provides adjusted historical returns and an Extended Performance Rating for some investment options in its universe. This means that any share class that doesn't have a 1,3-,5-, or 10-year performance history may receive a hypothetical Morningstar Rating based on the oldest surviving share class of the investment option. First Morningstar computes the investment options' new return stream by appending an adjusted return history of the oldest share class. Next, the Extended Performance Rating is determined by comparing the adjust-historical returns to the current open-end investment option universe to identify placement on the bell curve used to assign the Morningstar Rating.

Morningstar Return

This statistic is a measurement of an investment option's excess return over a risk-free rate (the return of the 90-day Treasury bill), after adjusting for all applicable investment option level loads and sales charges. In each Morningstar Category, the top 10% of investment options earn a High Morningstar Return, the next 22.5% Above Average, the middle 35% Average, the next 22.5% Below Average, and the bottom 10% Low. Morningstar Return is measured for up to three time periods (three-, five-, and 10-years). These separate measures are then weighted and averaged to produce an overall measure for the investment option. Investment options with less than three years of performance history are not rated.

Morningstar Risk

This statistic evaluates the variations in an investment option's monthly returns, with an emphasis on downside variations. In each Morningstar Category, the 10% of investment options with the lowest measured risk are described as Low Risk, the next 22.5% Below Average, the middle 35% Average, the next 22.5% Above Average, and the top 10% High. Morningstar Risk is measured for up to three time periods (three-, five-, and 10-years). These separate measures are then weighted and averaged to produce an overall measure for the investment option. Investment options with less than three years of performance history are not rated.

Risk Measures

R-squared reflects the percentage of an investment option's movements that are explained by movements in its benchmark index, showing the degree of correlation between the investment option and the benchmark.

Beta is a measure of an investment option's sensitivity to market movements. A portfolio with a beta greater than 1 is

more volatile than the market, and a portfolio with a beta less than 1 is less volatile than the market.

Alpha measures the difference between an investment option's actual returns and its expected performance, given its level of risk (as measured by beta).

Sharpe Ratio uses standard deviation and excess return to determine reward per unit of risk.

Standard deviation is a statistical measure of the volatility of the investment option's returns.

Morningstar Style Box™

The Morningstar Style Box reveals an investment option's investment style as of the date noted on this report.

For equity investment options the vertical axis shows the market capitalization of the long stocks owned and the horizontal axis shows investment style (value, blend, or growth).

For fixed-income investment options, the vertical axis shows the credit quality of the long bonds owned and the horizontal axis shows interest rate sensitivity as measured by a bond's effective duration.

Morningstar seeks credit rating information from investment option companies on a periodic basis (e.g., quarterly). In compiling credit rating information Morningstar accepts credit ratings reported by investment option companies that have been issued by all Nationally Recognized Statistical Rating Organizations (NRSROs). For a list of all NRSROs, please visit

http://www.sec.gov/divisions/marketreg/ratingagency.htm. Additionally, Morningstar accepts foreign credit ratings from widely recognized or registered rating agencies. If two rating organizations/agencies have rated a security, investment option companies are to report the lower rating; if three or more organizations/agencies have rated a security, investment option companies are to report the median rating, and in cases where there are more than two organization/agency ratings and a median rating does not exist, investment option companies are to use the lower of the two middle ratings. PLEASE NOTE: Morningstar, Inc. is not itself an NRSRO nor does it issue a credit rating on the investment option. An NRSRO or rating agency ratings can change from time-to-time.

For credit quality, Morningstar combines the credit rating information provided by the investment option companies with an average default rate calculation to come up with a weighted-average credit quality. The weighted-average credit quality is currently a letter that roughly corresponds to the scale used by a leading NRSRO. Bond investment options are assigned a style box placement of "low", "medium", or "high" based on their average credit quality, investment options with a low credit quality are those whose weighted-average credit quality is determined to be less than "BBB-"; medium are those less than "AA-", but greater or equal to "BBB-"; and high are those with a weighted-average credit quality of "AA-" or higher. When classifying a bond portfolio, Morningstar first maps the NRSRO credit ratings of the underlying holdings to their respective default rates (as determined by Morningstar's analysis of actual historical

default rates). Morningstar then averages these default rates to determine the average default rate for the entire bond investment option. Finally, Morningstar maps this average default rate to its corresponding credit rating along a convex curve.

For interest-rate sensitivity, Morningstar obtains from investment option companies the average effective duration. Generally, Morningstar classifies a fixed-income investment option's interest-rate sensitivity based on the effective duration of the Morningstar Core Bond Index (MCBI), which is currently three years. The classification of Limited will be assigned to those investment options whose average effective duration is between 25% to 75% of MCBI's average effective duration; investment options whose average effective duration is between 75% to 125% of the MCBI will be classified as Moderate; and those that are at 125% or greater of the average effective duration of the MCBI will be classified as Extensive. For municipal bond investment options, Morningstar also obtains from investment option companies the average effective duration. In these cases static breakpoints are utilized. These breakpoints are as follows: (i) Limited: 4.5 years or less; (ii) Moderate: more than 4.5 years but less than 7 years; and (iii) Extensive: more than 7 years. In addition, for non-US taxable and non-US domiciled fixed income investment options static duration breakpoints are used: (i) Limited: less than or equal to 3.5 years; (ii) Moderate: greater than 3.5 and less than equal to 6 years; (iii) Extensive: greater than 6 years.

Investment Risk

Foreign Securities Investment Options/Emerging Market Investment Options: The investor should note that investment options that invest in foreign securities involve special additional risks. These risks include, but are not limited to, currency risk, political risk, and risk associated with varying accounting standards. Investing in emerging markets may accentuate these risks.

Sector Investment Options: The investor should note that investment options that invest exclusively in one sector or industry involve additional risks. The lack of industry diversification subjects the investor to increased industry-specific risks.

Non-Diversified Investment Options: The investor should note that investment options that invest more of their assets in a single issuer involve additional risks, including share price fluctuations, because of the increased concentration of investments

Small Cap Investment Options: The investor should note that investment options that invest in stocks of small companies involve additional risks. Smaller companies typically have a higher risk of failure, and are not as well established as larger blue-chip companies. Historically, smaller-company stocks have experienced a greater degree of market volatility than the overall market average.

Mid Cap Investment Options: Stocks of mid-capitalization companies entail greater risk and are usually more volatile than stocks of larger companies.

High-Yield Bond Investment Options: The investor should note that investment options that invest in lower-rated debt securities (commonly referred to as junk bonds) involve

Disclosure

additional risks because of the lower credit quality of the securities in the portfolio. The investor should be aware of the possible higher level of volatility, and increased risk of default.

Tax-Free Municipal Bond investment options: The investor should note that the income from tax-free municipal bond investment options may be subject to state and local taxation and the Alternative Minimum Tax.

AUL Fixed Interest Account

There will be one of two transfer restrictions that apply to AUL Fixed Interest Account transfers depending on whether a competing option is an available investment option for participant accounts. The list of competing options include: OneAmerica Money Market, Vanguard Short-Term Federal Bond, or OneAmerica Short Term Separate Account.

1. If a competing option is available and:

A. You have \$2,500 or more in the AUL Fixed Interest Account at the beginning of the contract year, up to 20% of that amount may be transferred during that contract year.

OR

B. You have less than \$2,500 in the AUL Fixed Interest Account at the beginning of the contract year, you may transfer any amount from the AUL Fixed Interest Account during that contract year.

2. If a competing option is not available, then one hundred percent (100%) may be transferred from the AUL Fixed Interest Account at any time. However, once a transfer has been made from your AUL Fixed Interest Account balance, transfers back into the AUL Fixed Interest Account are allowed only after 90 days have elapsed since your last transfer from the AUL Fixed Interest Account.

AUL's crediting policy for the AUL Fixed Interest Account

New deposits are assigned to a calendar-quarter deposit period (Quarterly Interest Pocket) and earn interest at a rate that is guaranteed through its maturity date on December 31 of the following calendar year. Maturing quarterly interest pockets are combined into an annual renewal interest pocket earn the same rate of interest. Annual renewal interest pocket are combined into annual periodic interest pocket after five full calendar years. Each year, an interest rate is declared for each maturing interest pocket and is guaranteed for the calendar year. All interest rates for a quarterly pocket, an annual renewal pocket or an annual portfolio pocket will equal or exceed the rate guaranteed in the group annuity contract.

AUL's crediting policy for the AUL Stable Value Account(SVA)

All Contributions and transfers to the SVA will earn interest at the Guaranteed Rate in effect at the time such Contribution or transfer is made. All monies in the SVA will earn interest at that Guaranteed Rate until that Guaranteed Rate is changed. We may declare a new Guaranteed Rate for the SVA that becomes effective on January 1 of each calendar year; however, any increase in the Guaranteed Rate shall never be greater than [1.00%] above the previously declared rate. Declaration of a new rate will be at least [30] days in advance of the effective date of the new rate.

Information for Participant

- The election made in the "Participant Election" section of this form applies until changed by you. Elections can be changed by logging into your secure account at www.oneamerica.com or by contacting your plan representative. The effective date of your election will be determined by your employer and is dependent upon Plan document provisions.
- 2. If allowed and if you are eligible to make catch-up contributions, any of your elective deferrals that exceed either the elective deferral dollar limit (the Internal Revenue Code (Code) section 402(g) limit), the annual additions limit (the Code section 415 limit), the plan's deferral limit, or the Actual Deferral Percentage (ADP) limit shall be treated as catch-up contributions, up to the applicable catch-up contributions limit for the calendar year.
- 3. For any calendar year that you make elective deferrals to a retirement plan sponsored by an unrelated employer as well as to this Plan, you are responsible for determining if you have exceeded the Code section 402(g) limit in effect for such taxable (calendar) year.
- 4. Contributions received on your behalf will be directed based on elections selected by you, if your employer is not directing the investment of your contributions, by logging into your secure account at www.oneamerica.com, by completing an "Investment Option Election Form" (R-20089), or by calling 1-800-249-6269.
- 5. If you do not select investment options through one of the means mentioned above, if your employer is not directing the investment of your contributions, contributions received on your behalf will be directed to the applicable default investment option. It is your responsibility to log into your secure account at www.oneamerica.com or to call 1-800-249-6269 to transfer contributions to other available investment options.

Additional plan-specific provisions or limitations may apply. Please refer to your summary plan description (SPD) or contact your plan representative for assistance.

Participant Acknowledgement and Signature

I understand that (1) if I am a participant in a 403(b) or a 457 plan that restrictions on distributions may apply as set forth in Section 403(b)(11) or Section 457 of the Internal Revenue Code; (2) I have a duty to review my pay records (pay stub, etc.) to confirm that my election is implemented by my employer as requested under the "Participant Election" section of this form.

I also understand that (1) tax-qualified retirement plans from American United Life Insurance Company® (AUL) are funded by an AUL group annuity contract; (2) while a participant in an annuity contract may benefit from additional investment and annuity-related benefits under the annuity contract, any tax deferral is provided by the Plan and not the annuity contract; and (3) this material must be preceded by or accompanied by the "State Specific Fraud Warning Notices for Retirement Services" (R-20402) form.

Under penalties of perjury, by signing the below, I hereby certify (1) that the Social Security (or Taxpayer ID) Number provided under the "Participant Information" section of this form is correct; and (2) that I am not subject to backup withholding because (a) I have not been notified that I am subject to backup withholding as a result of a failure to report interest and dividends, or (b) the Internal Revenue Service (IRS) has notified me that I am no longer subject to backup withholding.

NOTE: The IRS does not require your consent to any portions of this document other than certifications required to avoid backup withholding.

Information for Participant

- 1. Investment elections will take effect when this form is processed by the record keeper. Contributions received after the date this form is processed will be invested according to your elections, if your employer is not directing the investment of your contributions, until changed by you. Contributions received prior to the date this form is processed will be invested according to elections already on file, if applicable, or will be directed to the applicable default investment option. It is your responsibility to log into your secure account at www.oneamerica.com or to call 1-800-249-6269 to transfer contributions to other available investment options.
- 2. If you do not complete the "Investment Elections" section of this form, if your employer is not directing the investments of your contributions, contributions received on your behalf will be directed to the applicable default investment option. It is your responsibility to log into your secure account at www.oneamerica.com or to call 1-800-249-6269 to transfer contributions to other available investment options.
- 3. All or part of your account value may be transferred between available investment options at any time during the accumulation period, subject to the following:
 - a. Only one transfer may be made per day.
 - b. You may be limited to the number of investments selected in a single transfer request.
 - c. Your reallocated investment total must equal the current investment total.
 - d. The investment return and principal value of the investment accounts will fluctuate, so that when redeemed, units may be worth more or less than the original cost.
- 4. Contributions, other than those directed to the AUL general account (fixed interest investment option), will be credited to the AUL separate account, which is divided into variable investment accounts. Each variable investment account invests exclusively in shares of a specific mutual fund, mutual fund portfolio, or other entity in which it is authorized to invest. Due to the fluctuation in value of the assets underlying the AUL separate account, the value of variable investment account units credited to the contractholder or the participant will also fluctuate, so that units may be worth more or less than the original cost when redeemed.
- 5. The following transfer restriction will apply to monies in the Fixed Interest Account (FIA):
 One hundred percent (100%) may be transferred from the Fixed Interest Account (FIA) at any time. However, once a transfer has been made from the FIA, transfers back into the FIA are allowed only after 90 days have elapsed since your last transfer from the FIA.

Additional plan-specific provisions or limitations may apply. Please refer to your summary plan description (SPD) or contact your plan representative for assistance.

Participant Acknowledgement and Signature

All States Not Listed Below: Any person who knowingly presents a false or fraudulent claim for payment of a loss or benefit or knowingly presents false information in an application for insurance is guilty of a crime and may be subject to civil fines and criminal penalties.

Alabama: Any person who knowingly presents a false or fraudulent claim for payment of a loss or benefit or who knowingly presents false information in an application for insurance is guilty of a crime and may be subject to restitution fines or confinement in prison, or any combination thereof.

Colorado: It is unlawful to knowingly provide false, incomplete or misleading facts or information to an insurance company for the purpose of defrauding or attempting to defraud the company. Penalties may include imprisonment or fines, denial of insurance and civil damages. Any insurance company or representative of an insurance company who knowingly provides false, incomplete or misleading facts or information to a policyholder or claimant for the purpose of defrauding or attempting to defraud the policyholder or claimant with regard to a settlement or award payable from insurance proceeds shall be reported to the Colorado Division of Insurance within the department of regulatory agencies.

Florida: Any person who knowingly and with intent to injure, defraud, or deceive any insurer files a statement of claim or an application containing any false, incomplete, or misleading information is guilty of a felony of the third degree.

Georgia, Oregon, Vermont: Any person who knowingly presents a false or fraudulent claim for payment of a loss or benefit or knowingly presents false information in an application for insurance may be guilty of a crime and may be subject to civil fines and criminal penalties.

Kentucky: Any person who knowingly and with intent to defraud any insurance company or other person files an application for insurance containing any materially false information or conceals, for the purpose of misleading, information concerning any fact material thereto commits a fraudulent insurance act, which is a crime.

Maine, Tennessee, Washington: It is a crime to knowingly provide false, incomplete or misleading information to an insurance company for the purpose of defrauding the company. Penalties include imprisonment, fines and a denial of insurance benefits.

Maryland: Any person who knowingly or willfully presents a false or fraudulent claim for payment of a loss or benefit or who knowingly or willfully presents false information in an application for insurance is guilty of a crime and may be subject to fines and imprisonment.

New Jersey: Any person who includes any false or misleading information on an application for an insurance policy is subject to criminal and civil penalties.

New Mexico: Any person who knowingly presents a false or fraudulent claim for payment of a loss or benefit or knowingly presents false information in an application for insurance is guilty of a crime and may be subject to civil fines and criminal penalties.

Ohio: Any person who, with intent to defraud or knowing that he is facilitating a fraud against an insurer, submits an application or files a claim containing a false or deceptive statement is guilty of insurance fraud.

Oklahoma: WARNING: Any person who knowingly, and with intent to injure, defraud or deceive any insurer, makes any claim for the proceeds of an insurance policy containing any false, incomplete or misleading information is guilty of a felony.

Pennsylvania: Any person who knowingly and with intent to defraud any insurance company or other person files an application for insurance or statement of claim containing any materially false information or conceals for the purpose of misleading, information concerning any fact material thereto commits a fraudulent insurance act, which is a crime and subjects such person to criminal and civil penalties.

Virginia: Any person who, with the intent to defraud or knowing that he is facilitating a fraud against an insurer, submits an application or files a claim containing a false or deceptive statement may have violated the state law.

Participant Beneficiary Designation Form

(For plans offering Qualified Pre-Retirement Survivor Annuities)

Products and financial services provided by American United Life Insurance Company® a OneAmerica® company One American Square, P.O. Box 6011 Indianapolis, IN 46206-6011 1-800-249-6269

Instructions for the Plan Participant

- 1. Complete the "Participant Marital Status" section of this form.
- 2. To elect that a pre-retirement benefit be distributed in a form *other than* a life annuity, complete the "Election of Pre-Retirement Death Benefit" section of this form.
- 3. To designate a Beneficiary or Beneficiaries, complete the "Beneficiary Designation" section of this form.
- 4. Read, then complete the "Participant Signature" section of this form.
- 5. If you are married and have met any of the requirements necessary for spousal consent, have your spouse read, then complete the "Spousal Authorization" section of this form.
- 6. Keep a copy of the completed form with your other important records and return the original to your plan representative.

Information for Plan Participant

Trust Information

If your Beneficiary is a trust, there shall be no obligation to inquire into the terms of the trust, and payment of the proceeds as provided in the designation will be a full discharge from all liability. If, before payment of the proceeds is made, satisfactory proof is presented that the trust has been revoked or is not in effect at your death, the proceeds shall be paid to the next class of Beneficiary or to your estate if there is no such Beneficiary. If the trust has been created by a will but fails to come into existence for any reason, the proceeds shall be paid to the next class of Beneficiary or to your estate if there is no such Beneficiary.

Community Property Information

(Only applicable to plans not subject to the Employee Retirement Income Security Act (ERISA) of 1974 and in the states of Arizona, California, Idaho, Louisiana, Nevada, New Mexico, Puerto Rico, Texas, Washington and Wisconsin. This is also applicable in Alaska if you and your spouse agree to make it community property through a community property agreement or a community property trust.)

If there has been no previous written notice of community property interest and the space for the consent of your spouse is not completed, then anyone acting on the information contained herein shall be entitled to rely on his/her good faith belief that no such interest exists.

This good faith reliance shall apply to any payment to a named Beneficiary even though:

- 1. You have not obtained the consent of a former spouse having a community interest; or,
- 2. You and your spouse subsequently divorce; or,
- 3. Your spouse dies after the date of execution of this designation; or,
- 4. You and your spouse subsequently sever your interest in the community.

Qualified Pre-Retirement Survivor Annuity (QPSA) Information

This form assumes that your plan provides for a QPSA of 100% of your vested account balance at death. Plan documents may differ in their provisions concerning such items as revocability of spousal consent, the minimum percentage for a QPSA, and other significant matters. Contact your plan representative if you have questions about your plan document or provisions specific to your plan.

Many plan documents provide that if you do not waive the QPSA benefit then your spouse has the option to choose the QPSA or another form of available distribution under the plan. Contact your plan representative if you have guestions about your plan document or provisions specific to your plan.

Your plan provides that a Qualified Pre-Retirement Survivor Annuity (QPSA) be paid to your spouse in the event that your death occurs before the benefit under the plan becomes payable. A portion of the value of your vested account balance at death (between 50% and 100%, according to your plan) is used to provide a monthly payment to your spouse for life. This form of benefit is a "life annuity."

You may elect a form of distribution other than a QPSA if your plan allows. In order for such an election to be effective, it must be in writing and must include the consent of your spouse, witnessed by a plan representative or a Notary Public.

The plan may provide that any such election may be revoked at any time, thereby reinstating the QPSA. You may choose to decline the automatic QPSA, but only under certain circumstances, as described below. The period during which you may elect to decline the automatic QPSA starts on the latest of:

- 1. The first day of the plan year in which you attain age 35, or
- 2. The date on which you first become a participant, or
- 3. The date on which you are married.

Instructions for Plan Representative

Retain the original Beneficiary Designation with your plan's important documents. American United Life Insurance Company® does not require a copy for its records.

Participating in your plan

eEnrollment

Registration

- 1. Go to www.oneamerica.com/enrollment
- 2. Click on "Register for a new account".
- 3. Select the "Account Services" link.
- **4.** Complete the step-by-step registration process, which includes:
 - Entry of your plan number and personal information
 - Complete account setup

Enrollment

- 1. Enter your User ID and Password created during registration. Click Login.
- **2.** Complete the step-by-step enrollment process, which includes:
 - Determine what you will contribute
 - Select your investment options

Paper enrollment

Paper forms are available. Please complete and return them following the instructions given by your plan representative.

Consolidating retirement accounts

You are able to roll over or transfer an existing qualified retirement plan account from a prior employer immediately.

Benefits of account consolidation include:

- · One point of contact for your retirement questions
- Reporting of your retirement assets on a single account statement
- One account for allocation and diversification of your retirement portfolio

Considerations include:

- Your prior account's investment options and cost structure
- Possibility of moving your account(s) into an Individual Retirement Account (IRA)

You will have an opportunity to initiate a rollover or transfer of your accounts during the enrollment process. For assistance in initiating a rollover or transfer, call 1-800-249-6269 Monday through Friday from 8 a.m.to 8 p.m. Eastern Time (ET).

Enroll today

at www.oneamerica.com/enrollment, by filling out the enrollment forms or by calling **1-800-249-6269**.

Notes

Products issued and underwritten by American United Life Insurance Company® (AUL), a OneAmerica company.

This information is provided for overview or general educational purposes only. This is not to be considered, or intended to be legal or tax advice. Changes in the tax law may affect the information provided. Investors should consult with their legal or tax advisors for personalized assistance, including any specific state law requirements.

Investing always involves risk, including the potential loss of principal. Participants should carefully consider their risk tolerance, investing time horizon, needs, and objectives as well as the specific risks and limitations associated with each of the investment options before investing. It is important to note that there are costs associated with the group annuity including investment costs associated with each of the investment options, as well as expense fees and contract charges.

Investment options summary pages and performance information are available for most investment options, but not all options.

The retirement plan discussed is funded by a group annuity. A variable annuity contract is a long-term, tax-deferred investment designed for retirement that will fluctuate in value. The annuity has underlying investment options. These investment options may not be available for purchase outside the variable annuity. Contributions are used to purchase units of an investment account within an AUL separate account and AUL in turn purchases shares of the corresponding investment option.

Non-registered group annuity contracts are issued by American United Life Insurance Company® (AUL), One American Square, Indianapolis, IN 46206, 1-800-249-6269. While a participant in an annuity contract may benefit from additional investment and annuity related benefits under the annuity contract, any tax deferral is provided by the plan and not the annuity contract.

Tax qualified retirement plans from American United Life Insurance Company® (AUL) are funded by an AUL group annuity contract. While a participant in an annuity contract may benefit from additional investment and annuity related benefits under the annuity contract, any tax deferral is provided by the plan and not the annuity contract.

Investments made into the plan are tax-deferred. The tax deferral is a result of the tax treatment of the plan itself and not the group annuity. The group annuity adds no additional tax benefit. Withdrawals from the plan may be taxed as ordinary income and, remember, if withdrawals are made before age 59½, there may be an additional 10 percent tax penalty in addition to the ordinary income tax due.

AUL's Retirement Services products offer flexibility and diversity in investment options through our group annuity contract to help plan participants reach their retirement goals. Participants invest in AUL separate accounts, which in turn invest in underlying funds.

The use of multiple leading investment companies on a single platform allows access to quality investments and the ability to select investments by specialty without locking into their company's full product lineup. Plan participants own units of an AUL separate account, not shares of any underlying fund.

Provided content is for overview and informational purposes only and is not intended and should not be relied upon as individualized tax, legal, fiduciary, or investment advice.

Your plan may offer the services of a third party advisor not affiliated with the companies of OneAmerica.

The strength of OneAmerica

As a part of a mutual organization, we answer to our customers, not outside shareholders or Wall Street. Our solid ratings are proof that you can feel confident your retirement plan is serviced by a highly reputable company.

Financial ratings

A.M. Best

A+ (Superior) — Stable outlook

A.M. Best's A+ (Superior) rating is second highest of 16 possible ratings, according to the July 20, 2017 press release and reflects:

- Consistently strong sales, excellent retention and positive net flows which contribute to strong operating earnings
- Strong risk-based capital position
- Diversified sources of revenue and earnings from established niche positions in core Retirement Services and Individual Life segments
- Growth in core markets full-service small and mid-sized retirement plans, life insurance and asset-based long-term care
- Well-developed enterprise risk management framework
- Well-managed investment portfolio

S&P

AA- — Stable outlook

Standard and Poor's AA- rating is fourth highest of 21 possible ratings, according to the October 4, 2017 report and reflects:

- Strong competitive position supported by a leading market position in its Care Solutions line, consistent sales growth, especially in retirement services, and strong retention
- Growing captive agency and diversified distribution network
- Extremely strong capital and earnings
- Low product risk profile
- Strong liquidity
- A well-developed and clearly articulated risk management program

The companies of OneAmerica offer other ways to help!

Retirement preparation is an important part of helping you reach your overall life goals, but there are other ways the companies of OneAmerica can help you and your family:

Life insurance

We offer a variety of life insurance products, including whole life, term and universal options. Our competitively priced policies can help provide peace of mind for you and your loved ones.

Care solutions

Preparing for the possibility of long-term care means weighing your options and positioning your assets to protect you and your family. We offer several options, including life insurance and deferred annuities that provide a way to increase your long term care benefits while passing your assets to your heirs if care is never needed.

Disability income insurance

Make sure you and your family are financially insured in the event that a disability keeps you out of work for an extended period of time. Count on our professionals to help design a policy that protects your income.

Note: While the companies of OneAmerica offer these products and services, it is important that you work with your financial professional to determine if such services are suitable for you and your future goals.

These ratings reflect assessments of the claims-paying ability of American United Life Insurance Company® (AUL), The State Life Insurance Company® (State Life), and Pioneer Mutual Life Insurance Company® (PML). S&P does not provide an assessment of the claims paying ability of PML. They are not intended to reflect the investment experience or financial strength of any variable account, which is subject to market risk. Ratings are under continuous review and subject to change and/or affirmation.
